

PACKS

ALPS ELITE

We've been waiting for Alps to enter the world of high-end packs for a while, and in 2022 they are making a splash. The Elite series is designed to carry the heaviest of loads easily and comfortably. The frame weighs in at 3 pounds, 10 ounces and features an ergonomic lumbar design. A load shelf assists with packing meat and other cumbersome loads, and the frame can be used by itself or in conjunction with the hunter's choice of an 1,800- or 3,800-cubic-inch pack.
