The Best Bowhunting Backpacks of 2023

Archery expert P.J. Reilly gives his top picks for comfortably carrying all your gear during bow season

Best Overall: ALPS OutdoorZ Pursuit Backpack

WHY IT MADE THE CUT:

"This pack has plenty of room to haul everything you need to sit on the stand all day without the bulk and rigidity of a frame pack and runs just under \$100.."

I'm someone who hauls a lot of gear into the woods when I bowhunt, and this pack has plenty of room, without the bulk and weight. And it costs under \$100. So the pursuit pack hits the trifecta for me and is one of the best hunting backpacks available. The Pursuit has the capacity to carry anything and everything I want. The storage capacity is listed as 2,700 cubic inches, but its hauling capacity is even greater when you start strapping things to the outside.
